

ADD-ON TRAINING

B.Tech 3rd & 4th Year

Applied Cloud Computing for Software Development

Under

TechSaksham

22 November, 2023 to 04 January, 2024
Monday to Friday

11:00 AM to 01:00 PM

Computer Lab, Block A

1800 103 8797 | www.mietengineering.org

Plot No. 3, Knowledge Park-II, Greater Noida, Delhi-NCR, India

Date: - 17th Nov 2023

Notice

MIET is going to organize the Value-Added Certification Course "Applied Cloud Computing for Software Development" for the students of B.Tech 3rd year and 4th year, as per the following details.

Date of Commencement: 22nd November, 2023

Beneficiaries: B.Tech 3rd and 4th year students

Total Duration: 42 Hours

Venue: Computer Lab 1 & 2

Resource Person: Karan Bhat (Trainer-Under Tech-Saksham, a joint CSR initiative between Microsoft and SAP, implemented by Edunet Foundation)

for - Ankit

Abhishek Sharma
Head - CRD

CC to :-

1. Director Engineering
2. Director IQAC
3. HOD
4. All Faculty Members
5. Notice Board
6. Office File

Syllabus and Schedule

Name of Training program: Applied Cloud Computing for Software Development
 Training Duration: 42 Hrs.

S.No	Date	Day	Timing	Module
1	22 nd November 2023	Wednesday	11:00 AM - 01:00 PM	Introduction to Industry 4.0 and Full-Stack Development: Concepts and Trends
2	6 th December 2023	Wednesday	11:00 AM - 01:00 PM	HTML and CSS Basics: Responsive Web Design and Basic Page Creation
3	7 th December 2023	Thursday	11:00 AM - 01:00 PM	Java Script Basics: Variables, Functions, and DOM Manipulation
4	8 th December 2023	Friday	11:00 AM - 01:00 PM	Java Script ES6: Advanced Concepts like Promises, Modules, and Arrow Functions
5	11 th December 2023	Monday	11:00 AM - 01:00 PM	React Introduction: Basics of Components and Props
6	12 th December 2023	Tuesday	11:00 AM - 01:00 PM	React Advanced: State Management, Hooks, and Lifecycle Methods
7	13 th December 2023	Wednesday	11:00 AM - 01:00 PM	Node.js Basics: Introduction to Backend Development and REST API Creation
8	14 th December 2023	Thursday	11:00 AM - 01:00 PM	Express.js: Middleware, Routing, and RESTful API Development
9	18 th December 2023	Monday	11:00 AM - 01:00 PM	Mongo DB Integration: Database Basics and CRUD Operations with Mongoose
10	20 th December 2023	Wednesday	11:00 AM - 01:00 PM	Frontend and Backend Integration: Connecting React with Node.js API
11	21 th December 2023	Thursday	11:00 AM - 01:00 PM	Authentication and Authorization: JWT and Secure Login Systems
12	22 th December 2023	Friday	11:00 AM - 01:00 PM	Deployment: Deploying Full-Stack Applications to Cloud Platforms
13	26 th December 2023	Monday	11:00 AM - 01:00 PM	Introduction to Microservices and Serverless Architectures
14	27 th December 2023	Wednesday	11:00 AM - 01:00 PM	Real-Time Applications with Web Sockets: Build a Chat Application
15	28 th December 2023	Thursday	11:00 AM - 01:00 PM	Performance Optimization in Full-Stack Applications
16	29 th December 2023	Friday	11:00 AM - 01:00 PM	Testing: Unit, Integration, and E2E Testing in Full-Stack Development
17	1 st January 2024	Monday	11:00 AM - 01:00 PM	Applications in Industry 4.0: IoT, AI, and Automation Use Cases
18	2 nd January 2024	Tuesday	11:00 AM - 01:00 PM	Capstone Project Kickoff: Planning and Architecture Design
19	3 rd January 2024	Wednesday	11:00 AM - 01:00 PM	Capstone Project Development: Hands-On Coding and Reviews
20	4 th January 2024	Thursday	11:00 AM - 01:00 PM	Capstone Project Finalization: Testing and Deployment
21	5 th January	Friday	11:00 AM - 01:00 PM	Evaluation

Report on Applied Cloud Computing for Software Developments

Training Name: Applied Cloud Computing for Software Developments under Tech-Saksham, a joint CSR initiative between Microsoft and SAP, implemented by EduNet Foundation

Trainer Name: Mr. Karan Bhat

Total Registered Students: 81

Training Completed: 54

Training Duration: 22nd November to 5th January, 2024

Objective :

- Cloud Computing Fundamentals.
- Integrating Cloud with Full-Stack Applications.
- Automating Development and Deployment (CI/CD).
- Building Cloud-Native Applications.
- Security, Scalability, and Cost Optimization.

Day 1 - 22nd November 2023

Introduction to Industry 4.0 and Full-Stack Development: Concepts and Trends

The course began with an introduction to **Industry 4.0**, which represents the fourth industrial revolution characterized by the integration of advanced technologies like the Internet of Things (IoT), Artificial Intelligence (AI), and automation into industrial processes. Participants learned about the transformation these technologies bring to industries. The session also covered Full-Stack Development, which refers to the development of both the front end (client-side) and back end (server-side) of web applications. It set the foundation for the entire course by explaining the trends and tools that enable full-stack development in the context of Industry 4.0.

Day 2 - 6th December 2023

HTML and CSS Basics: Responsive Web Design and Basic Page Creation

This session introduced the fundamentals of HTML (Hypertext Markup Language) and CSS (Cascading Style Sheets). Participants learned how to structure web pages using HTML tags, making content accessible and well-organized. The focus was on creating basic static pages with clean and semantic HTML. In CSS, the focus was on styling the HTML elements. The key concept discussed was responsive design, where participants learned how to create flexible layouts using Flexbox and Grid that adapt to different screen sizes and devices. The session emphasized the mobile-first approach, where pages are optimized for mobile devices before adapting to larger screens.

Day 3 - 7th December 2023

JavaScript Basics: Variables, Functions, and DOM Manipulation

In this session, participants learned JavaScript, the programming language that adds interactivity to web pages. They started with basic concepts such as variables, which are used to store data, and functions, which allow developers to group code into reusable blocks. The core of the lesson was DOM manipulation (Document Object Model), where participants learned how JavaScript can interact with and modify HTML and CSS, such as changing the content of a page, responding to user inputs (e.g., clicking a button), or dynamically adding elements to the page.

Day 4 - 8th December 2023

JavaScript ES6: Advanced Concepts like Promises, Modules, and Arrow Functions

This session covered ES6 (ECMAScript 2015), the latest version of JavaScript, which introduced several new features to make JavaScript code cleaner and more efficient. Promises were introduced to handle asynchronous operations like fetching data from an API. Participants also learned about modules, which allow JavaScript code to be split into smaller, reusable files. The arrow functions syntax was explained, which simplifies writing functions, especially for callback functions or inline operations.

Day 5 - 11th December 2023

React Introduction: Basics of Components and Props

This session introduced React, a popular JavaScript library for building user interfaces, especially for single-page applications. Participants learned how React allows for a component-based architecture, where each piece of the UI is a self-contained component. The session focused on the basic concepts of components and props (properties). Components are the building blocks of a React application, and props allow data to be passed between them, making it easier to manage and reuse parts of the UI.

Day 6 - 12th December 2023

React Advanced: State Management, Hooks, and Lifecycle Methods

The participants explored more advanced concepts in React. They learned about state management, which allows components to manage and update their own data (like user input or the result of an API call). The session also covered React Hooks, such as use State and use Effect, which are functions that let you use state and lifecycle methods in functional components (instead of relying on class components). Lifecycle methods were explained as well, which allow developers to control different stages of a component's life, such as when it's created, updated, or removed.

Day 7 - 13th December 2023

Node.js Basics: Introduction to Backend Development and REST API Creation

The session shifted focus to the backend of web applications, introducing Node.js, a runtime environment that allows JavaScript to be used on the server side. Participants learned how to build RESTful APIs, which enable communication between the front-end and back-end of an application using HTTP methods (GET, POST, PUT, DELETE). The module emphasized how Node.js can handle requests, process data, and respond to clients.

Day 8 - 14th December 2023

Express.js: Middleware, Routing, and RESTful API Development

Express.js, a framework built on top of Node.js, was introduced to help streamline backend development. Participants learned how to use middleware, which are functions that execute during the

request-response cycle (e.g., validating data, handling authentication). The concept of routing was also introduced, which defines how the server responds to various client requests. By the end of the session, participants were able to build RESTful APIs using Express.js and handle the routing efficiently.

Day 9 - 18th December 2023
MongoDB Integration: Database Basics and CRUD Operations with Mongooo

The session focused on integrating a NoSQL database, MongoDB, with the Node.js backend. Participants learned about MongoDB's document-oriented structure, which stores data in JSON-like format, making it easier to work with dynamic data. They also learned how to perform CRUD (Create, Read, Update, Delete) operations using Mongoose, an Object Data Modeling (ODM) library for MongoDB that simplifies database interaction.

Day 10 - 20th December 2023
Frontend and Backend Integration: Connecting React with Node.js API

Participants learned how to connect their React front-end with the Node.js back-end through API calls. The focus was on using Axios or the Fetch API to send and receive data between the front end (React) and the back end (Node.js). By integrating the two, participants could create dynamic web applications where the front end displays data fetched from a server.

Day 11 - 21st December 2023
Authentication and Authorization: JWT and Secure Login Systems

In this session, participants learned about authentication and authorization, two essential concepts in web application security. They implemented JWT (JSON Web Tokens) to secure API endpoints and manage user sessions. Participants also learned how to build secure login systems that ensure only authorized users can access certain parts of the application.

Day 12 - 22nd December 2023
Deployment: Deploying Full-Stack Applications to Cloud Platforms

The focus of this session was deploying full-stack applications to cloud platforms. Participants learned about different deployment strategies and tools, including Heroku, AWS, and Netlify. They were shown how to prepare their application for production, ensuring it runs smoothly in a live environment.

Day 13 - 26th December 2023
Introduction to Microservices and Serverless Architectures

Participants learned about the concept of microservices, which breaks down large applications into smaller, independently deployable services. The session also introduced serverless architectures, where developers can build applications without worrying about managing servers, using platforms like AWS Lambda. This approach can help scale applications and reduce costs.

Day 14 - 27th December 2023
Real-Time Applications with Web Sockets: Build a Chat Application

This session taught participants how to build real-time applications using Web Sockets. They built a chat application where users can send and receive messages instantly. Web Sockets allow continuous two-way communication between the client and server, making it ideal for applications that require real-time updates.

Day 15 - 28th December 2023
Performance Optimization in Full-Stack Applications

Participants learned how to optimize full-stack applications for better performance. Topics included reducing page load times, optimizing database queries, and minimizing resource usage. Tools like Webpack, Lighthouse, and Tree-shaking were introduced to help participants streamline their applications and improve user experience.

Day 16

29th December 2023
Testing Unit, Integration, and E2E Testing in Full-Stack Development

This session covered different types of tests used to ensure the quality of web applications: unit testing (testing individual components), integration testing (testing how components work together), and end-to-end (E2E) testing (testing the whole application). Tools like Jest, Mocha, and Cypress were demonstrated for automating these tests.

Day 17 - 1st January 2024
Applications in Industry 4.0: IoT, AI, and Automation Use Cases

The focus of this module was on how full-stack development supports technologies like IoT, AI, and automation. Participants learned about real-world applications in various industries, such as manufacturing, healthcare, and logistics, where these technologies are transforming operations.

Day 18 - 2nd January 2024
Capstone Project Kick off: Planning and Architecture Design

Participants began their Capstone Project, where they applied all the knowledge gained in the course to build a full-stack application. This session focused on planning, designing the architecture of the project, and ensuring it was aligned with the course's industry 4.0 concepts.

Day 19 - 3rd January 2024
Capstone Project Development: Hands-On Coding and Reviews

Participants actively coded their Capstone Projects, with hands-on support from instructors. Regular reviews were conducted to ensure the projects were progressing according to plan, and any issues were addressed in real-time.

Day 20 - 4th January 2024
Capstone Project Finalization: Testing and Deployment

Participants finalized their projects by conducting testing, debugging, and deploying their

applications. The session emphasized ensuring the project was ready for production, addressing any issues, and deploying to cloud platforms.

Day 21 - 5th January 2024 Evaluation

The final day of the course involved evaluation of the Capstone Projects. Participants presented their projects, received feedback from instructors and peers, and discussed their learning experiences throughout the course.

Outcome:

- Proficiency in cloud computing platforms and services
- Ability to deploy and manage full-stack cloud applications.
- Implementation of CI/CD pipelines for automation.
- Expertise in cloud-native development using Docker, Kubernetes, and serverless computing.
- Strong understanding of cloud security and cost optimization practices.

TechSaksham Program

Batch Report

Respected Ma'am

Greetings!

We extend our heartfelt gratitude for your Invaluable collaboration In the TechSaksham Program. Your active participation and unwavering support have been Instrumental In the Initiative's success.

We are thrilled to announce that students enrolled In the program have completed the program and obtained their certifications as per the eligibility criteria.

Please find the brief table below for update on the program's completion, along with attached students' report. As you have access to the TechSaksham LMS, feel free to download the report anytime for your quick reference.

Should you have updates or wish to discuss further, please call or contact us. We look forward to continued collaboration in the coming years.

Mangalmai Institute of Engineering and Technology	MIOEAT_TSP3FC_ 2	72	65	Live on TechSaksham LMS

Thanks, and Regards

Sandeep Kour

Edunet Foundation | 9717806956

Associate Director-PM | TechSaksham Program

Memorandum of Understanding

This Memorandum of Understanding is entered on 17th Nov 2023 by and between EduNet Foundation having its office at A-11- 1105, Arcadia South City 2, Gurgaon 122018, India (hereinafter referred to as "EduNet"); and Mangalmai Institute of Engineering & Technology, (hereinafter referred to as "MIET") having its address Plot No. B & D, Knowledge Park - II, Greater Noida - 201310, India

Whereas, EduNet is a non-profit organization with multiple programs, sponsored by government and corporate entities, that are offered free to learners across the education spectrum, including but not limited to the Tech Saksham Program (www.techsaksham.org).

Whereas, Institution is a premier institution with the following details:

Established (year):	2011
Recognition, NAAC rating, ranking:	NA
Vision:	Mangalmai Institute of Engineering & Technology - Greater Noida, is committed to be the front-runner in the field of Engineering Education and to nurture students to attain the highest degree of professional competence in their respective fields.

And whereas, the Parties seek to collaborate with each other to mutually complement their synergies and to jointly work on building capacity of learners through one or more of the programs managed by EduNet.

Now therefore, this Memorandum of Understanding (hereinafter called "MOU") witnesses the following.

- 1. Term and termination :** This MOU is valid for an initial term of 5 years from the Effective Date. It can be extended by further periods, as agreed to by the Parties from time to time. Either Party may terminate this MOU by giving the other minimum 30 days' notice. The MOU will be deemed terminated at the end of the notice period or after completing all ongoing activities so that the beneficiaries (learners and teachers) are not negatively impacted, whichever is later.
- 2. Non-binding nature of this MOU :** The MOU is not binding on either Party and each is working with the other out of sheer good-will and for the benefit of the learners.
- 3. Each Party is responsible for its own costs :** Both the Institution and EduNet will independently manage their cost towards fulfillment of obligations under this MOU.
- 4. Team for program co-ordination:** Both the Parties shall appoint a suitable team/ SPOC who will serve as a primary point of contact on all matters related to program rollout. Individual learners and teachers may be in touch with corresponding trainers, mentors, advisors, and peers during program rollout. However, all the matters related to the execution of this MOU shall reside with the signing authority.
- 5. Program Calendar & Academic Calendar:** The SPOCs from both Parties will work with their respective internal stakeholders to develop a calendar for the program(s) rollout at the start of every quarter. This calendar will then be synchronized and published for use by Engin...

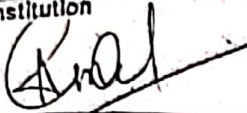

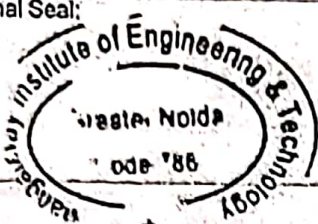

6. Responsibilities of Edunet and / or its program sponsors / partners:
- Orientation sessions : Edunet will conduct orientation sessions for learners and educators, at a mutually agreed schedule, to onboard them on to the program(s).
 - Program materials: Edunet will share all program materials with the institution and/ or learners as required. All sharing will be online and / or through electronic media.
 - Face to face, Instructor led sessions : For learners in the Tech Saksham Program, face to face ILT sessions will be organized on campus and will be delivered by Edunet Trainers to program beneficiaries.
 - Online Instructor led sessions: These sessions may take the form of webinars or mentoring workshops or technology boot camps or Innovation camps or career readiness workshops that will seek to assist learners in their career goals. These programs will be organized regularly as per a regular calendar, published online, and will be conducted by Edunet team members or program sponsors or external stakeholders as appropriate.
 - Interaction with Industry experts: Edunet will bring industry experts to the Institute or conduct virtual sessions to drive engagements with students through seminars / webinars or project mentorship.
 - Online platform availability : Online platforms for each of the program so interest to the Institution will be made available to it. Links for these platforms will be made available to the Institution in a timely manner.
 - Assessments: Edunet will conduct assessments, as required, for its programs prior to certification by Edunet and / or its industry partners and / or participating government agencies.
 - For programs with career paths: Edunet will provide linkages with local and regional industry or government (any one of them) that will help learners with gainful employment. Interactions will be encouraged in terms of classroom sessions, workshops, internship opportunities and career opportunities.
 - Updates: Edunet will keep Institution management updated with the progress of the program(s)
7. Responsibilities of Institution:
- Learner Identification : The Institute will identify learners, volunteers and instructors who may participate in program(s) offered by Edunet. The Institute will identify the learners whom the criteria for the programs shared by Edunet.
 - Support with orientation sessions: Institute will support Edunet conduct orientation sessions for all stakeholders.
 - Publication of program calendars and goals : Institute will publish, on a quarterly basis, a program calendar for all its participants.
 - Support with computer labs and classrooms: Institute will make its labs available to learners. It will make classrooms and / or audio-visual equipment available for face-to-face sessions, when ever required.
 - Support with attendance: Institute will ensure that program participants enthusiastically participate in chosen programs, with minimum attendance as agreed between the Parties.

- f. Support with assessments : Institute will ensure that assessments carried out on site are proctored and professionally managed.
- g. No fees : Institute will not charge any extra fees from learners for participation in Edunet programs.

IN WITNESS WHERE OF, the parties here to have executed this MOU on the Effective Date.
